

The design is set into two buildings A-B which are located on the river banks of teh river morava.
The two buildings are anchored on the old pilasters and they serve as bike-stops and chill by the cup of warm tea, repair of the bikes and as the open gate to farther journey across the land. Building located closer to the Sandberg, is serving as a relax place for exhausted bike-riders. The whole design is created to celebrate simple life with bike /pure pleasure/. It is also willing to look fresh and „in“. The main function of the design is the camp /to accomodate free folk from distaned places/. Comfort is achived by variety of relaxing activities as for example: romantic dinner by the sunset /or early breakfast with panoramatic view/. This all will hopefully bring people closer to sandberg and its beatiful natural surrroundigs.
