Sandberg was in turn the seabed, beaches and reefs. Within the

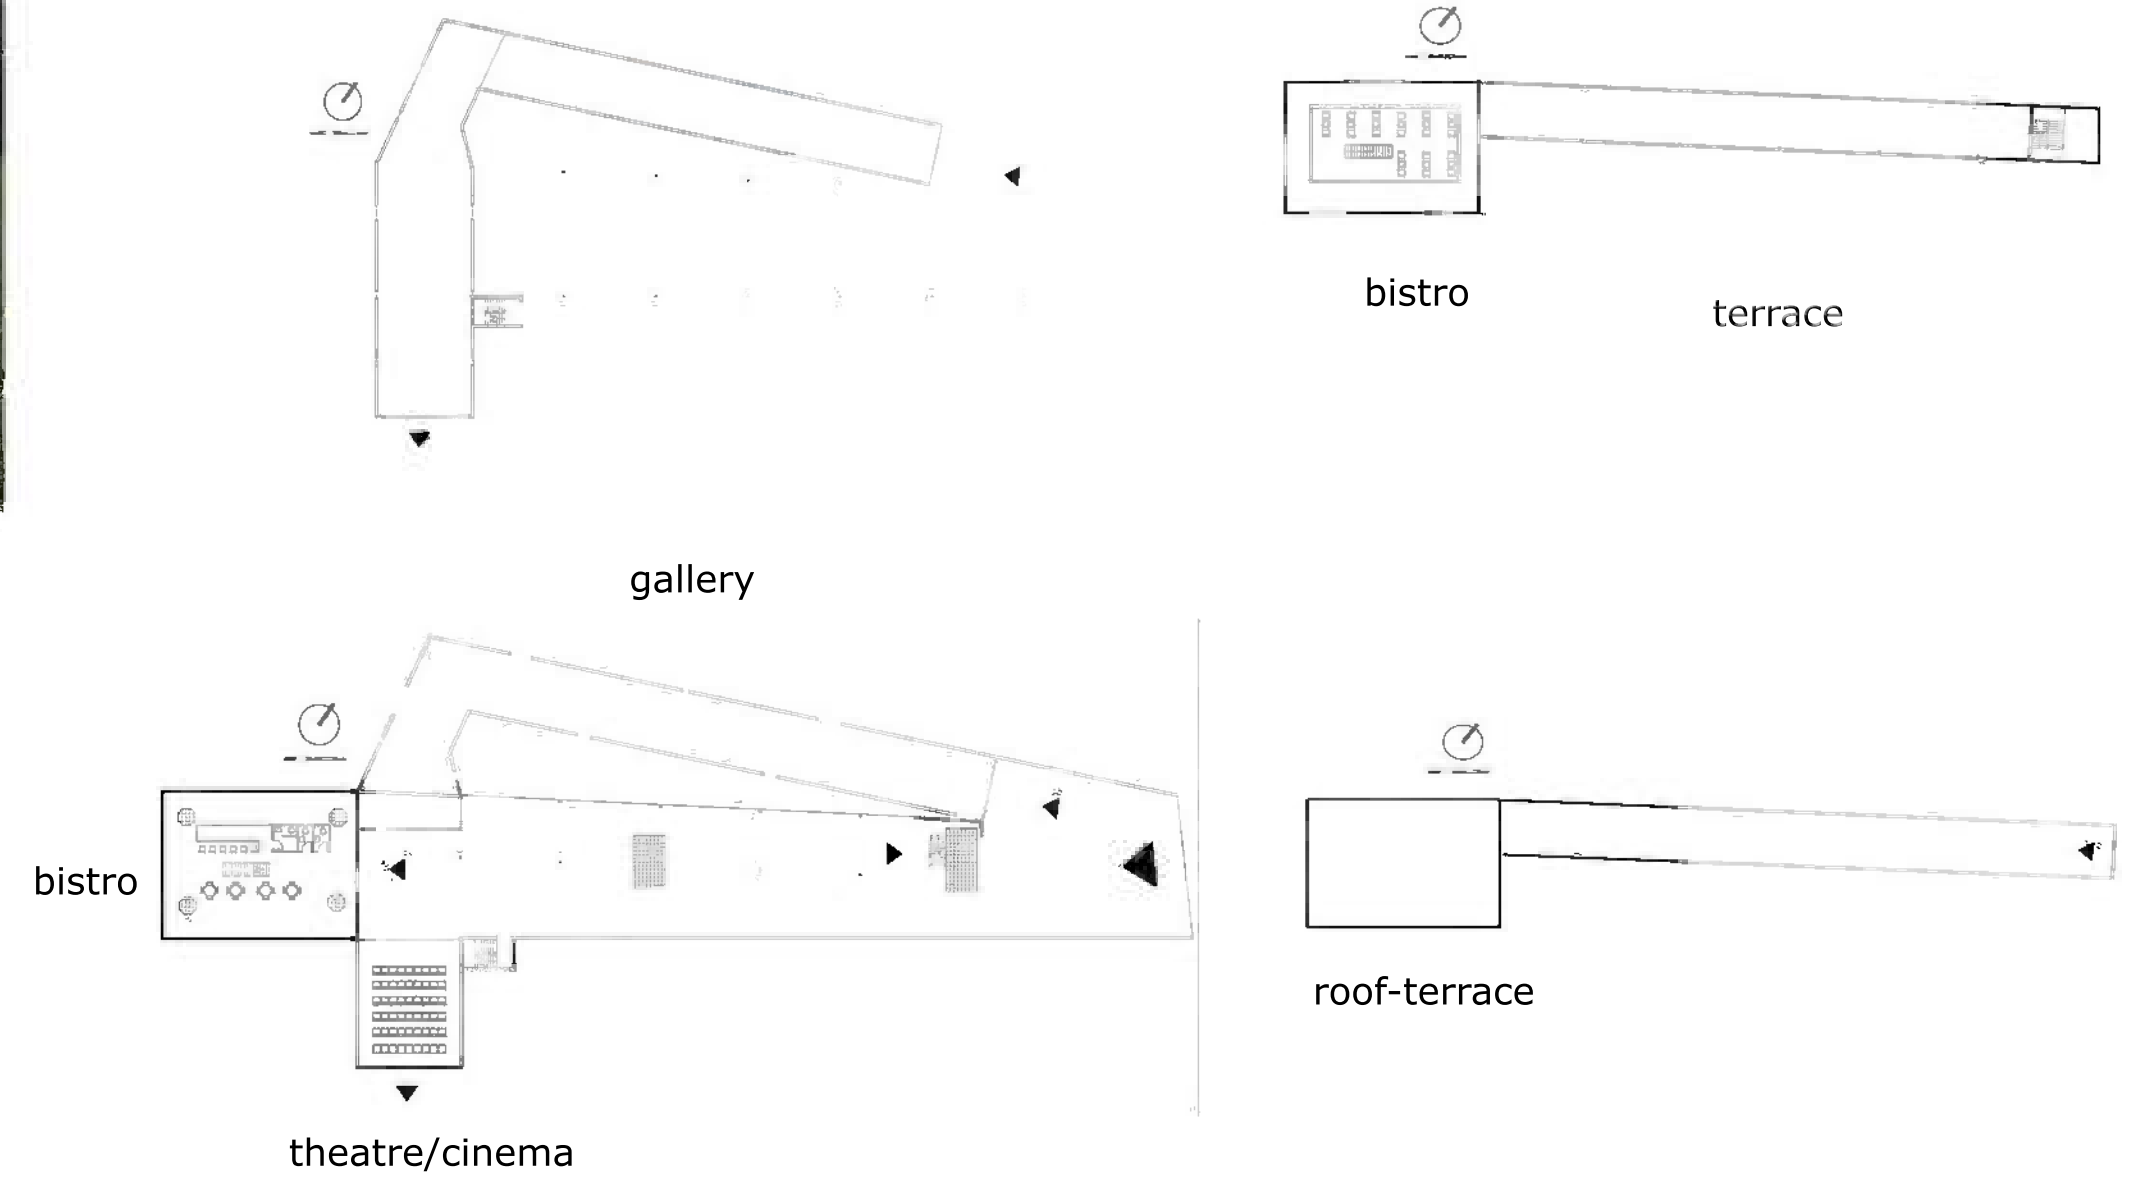

homo sapiens

situation

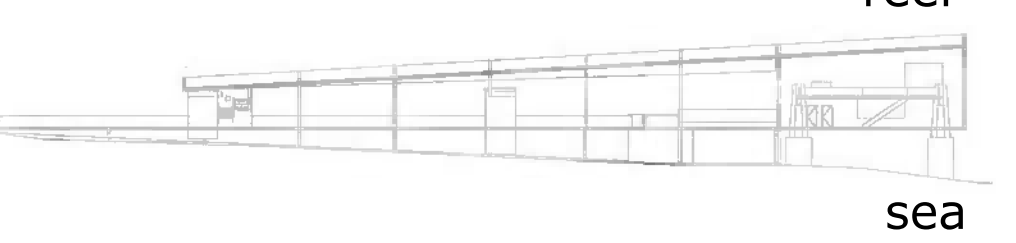

Sandberg lies near the border with Austria. Monuments before 1989, you might mention the triple-fence border state as well a massive watch tower on a sand hill under the hill a bit. At the entrance to the site with respect supervised soldiers sharp angles and an equally sharp weapons. Now everything is different. Fences disappeared from the state border in this area has become a "promenade and instead guard tower is now some telecommunications equipment

future

In good weather Sandberg offers a broad ridge of his vision for the Moravian field (Marchfeld). The place where Frederick combative, family of Premysl Otakar, successfully won his battle against the Tatars, and in 1278 Rudolf of Austria defeated Czech King Otakar, which play a permanent life. Building dominates the Moravian field is Schlosshof Baroque castle, which after World War II, Soviet troops occupied. Although the army destroyed all the artworks, which remained in the castle, after leaving the castle was restored and today there are exhibitions and concerts.

meditation place

Each view raises the question of the future.
where mankind going?
What shall we eat?
know what new?
